

Automated Eddy Current inspection systems

System Features

- Multi axes gantry up to 7 axes
- High quality granite table
- Rugged MS structure
- Fast inspection
- Custom software with contour following option
- Compatible with various eddy current equipments
- Live c-scans

WHY DHVANI ?

- Proven competency – Over 40 multi-axes systems installed across the world in various industries.
- Proven Track Record of Reliability and Service.

Eddy current inspection

Eddy current inspection is usually done for surface and sub surface defects in conductive components. Various other application includes bolt hole inspection , sorting etc.

Dhvani eddy current scanners are reliable, efficient and cost effective.
