

# Immersion UT testing machine for HIC analysis

## HIC Analysis

Hydrogen induced cracks are very common and periodic HIC UT sample analysis is mandated across the oil and gas industry as per standards.

Dhvani Research HIC UT automated analysis systems provide a fast and reliable solution for this requirement

## System Features

- Small and user friendly
- Sensitivity Uniformity Maximisation using 3 simultaneous probes with scanning focus at 3 different depths
- Automatic area calculation
- Automatic reporting
- Customised Reports
- Operation at the press of button

## Why Dhvani

- Proven competency – Over 40 multi-axes systems installed across the world in various industries.
- Proven Track Record of Reliability and Service.
- Many International Repeat Clients
